

Russell 2000 Index Crediting Strategy

The Russell 2000® Index measures the performance of the small-cap segment of the US equity universe. The Russell 2000 Index is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000 is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

STRATEGIC GOAL

With the Russell 2000 crediting strategy from Oceanview Life, we further our commitment to provide options that benefit the modern retiree or pre-retiree, in preserving and growing their retirement savings.
